

## **Wanfeng's Statement on Climate Change Statement**

Wanfeng recognizes the risks and opportunities that climate change brings to its business. We have been committed to practicing the "Green Wanfeng" concept and strictly implementing management policies. We effectively implement the accountability system, strengthen education and training, assess and manage the impact of climate change, and formulate development strategies that conform to global and industry practices. Our employees, suppliers and partners should uphold this statement and work together to achieve our goals.

### **To reduce the emission of greenhouse gases into the atmosphere, we will:**

- Increase the use of renewable energy and low-carbon energy where applicable;
- Incorporate environmental factors into procurement procedures, and promote the use of low-carbon and energy-saving products and services;
- Explore opportunities to offset carbon emissions;
- Where feasible, encourage employees, suppliers and customers to reduce carbon emissions in their daily operations and promote a low-carbon culture.

### **To ensure that our business adapts to the changing climate, we will:**

- Evaluate climate-related risks and opportunities through the climate change and risk management system, and formulate corresponding measures;
- Improve operational processes to deal with climate risks;
- Strengthen employees' awareness of climate change and emergency management.

### **To enhance our ability to quickly recover from the effects of climate change, we will:**

- Keep abreast of global and local climate-related trends, and strengthen understanding of best practices regarding the response feasibility of Wanfeng and our supply chain;
- Ensure that relevant information and resources are available to monitor and regularly assess the impact of climate change on our operations, and to review response strategies;
- Communicate with suppliers and customers on Wanfeng Aowei's climate risks, opportunities and response strategies to formulate appropriate response plans and help them improve their ability to respond to future climate-related issues.

### **In order to communicate transparently with stakeholders, we will:**

- Disclose climate-related information in a transparent and timely manner through the company's website, periodic reports and other channels.
- We will take into account business development, resources, capabilities and technology, and strive to implement the above strategies and practices. At the same time, we will maintain close cooperation with different business departments as needed, be responsible for the implementation and supervision of this policy, and report to the board of directors.
